Here goes the list of what these notes offer - Do your self-questions (means conceptual question in every topic) , Past papers , Short questions , Long questions , Multiple Choice Questions , Numerical problems.Chemistry, a subject having a hell lot of concepts all starting from a single definition of the smallest particle of our universe so-called 'atom'. In the 8th grade usually, we all know that we have to study only one book that combines chemistry, physics, and biology called science. But as, we got into 9th class things starts to get more complex now. We got three books instead of just one book. And, if you ask me chemistry is the most complex one (maybe not for you). Then, these chemistry notes for class 9 is enough. Understanding chemistry means remembering a lot of concepts. Also, the concepts of any subject that usually taught in the 9th class are the base on which you can grow in that particular subject. So that, we are providing you with the best chemistry notes for class 9.Consider that particular subject important in which you want to study for your whole life. And, read more than just the textbook about that particular subject. If you think you want to study chemistry for your whole life that's great, we need chemists.Well, you have read, it's a long list and all of these available at one place is like a free chicken dinner after a long day. We cover all of these topics in our notes and that's why we are sharing these notes with you guys. We have been through all of that from which you are going right now. You will find notes many places but not like ours that packs everything you want in order to understand concepts and archive good grades. Now, you are a matric student of part two and you have an idea how a question paper will be and how will you prepare for it. Let's discuss some important tips for preparing exams of mathematics subject. My first tip is: you should buy a rough register for doing the practice of mathematics solutions because the more practice you do, the more math will be easy for you. Let's move forward to further tips. You should prepare chapters in a way that the arrangement of chapters is in the textbook. As a result, if you do any topic, you have all the idea of what is done in a question because everything will be gone through from you. And it will be easy to prepare it from our math notes for class 10.Furthermore, talking about the exercises of a chapter, you must prepare from the start of the chapter. And understand all the topic and formulas, and by applying that formulas or methods you will have to practice their example questions. Finally, move forward to the exercises. Practice every question of an exercise one by one and if you see a question has many similar parts then you can skip some of them and practice only those parts they are unique or a little bit tough for you. You can do all the exercise in this manner. I recommend you should do questions yourself and if you find any difficulty simply skim the solution from our math notes for class 10.If you find this page or website helpful, do share with your friends and family. Try to spread love to your loving ones. And if you are a teacher, you should recommend this site to your class students to help them to get maximum marks in exams and share this site with your colleagues.
